Effective Date: August 1, 2009

STANDARD OFFER TARIFF

INTERRUPTIBLE SERVICE FOR IRRIGATION AND WATER PUMPING SERVICE SCHEDULE IS2

Availability

In the Cooperative's Certificated Area where its facilities are of adequate capacity and the required phase and suitable voltage are in existence and are adjacent to the premises served.

Application

The Interruptible Service for Irrigation and Water Pumping Service Rate (IS2) is applicable for General Service customers for Irrigation Pumping and Water Pumping loads from in excess of 10 kW and an average monthly load factor greater than 30% on an annualized basis. The Cooperative shall have the right to meter the installation in the most practical manner, either primary or secondary voltage, and to determine the number of meter (service) points at any installation.

In the event the customer has metered demand at the time of the AEPCO peak more than twice in a calendar year, the Cooperative may disconnect the controlling device and discontinue Interruptible Service. A customer removed for non-compliance may not be considered for Interruptible Service for a minimum of eighteen (18) months.

Type of Service

The type of service available under this schedule will be determined by the Cooperative and will normally be:

120/240 volt single phase, 120/208 volt three phase, or 277/480 volt three phase.

Monthly Rate

STANDARD RATE	Power Supply	Distribution Charges					Total Rate
		Metering	Meter Reading	Billing	Access	Total	
Customer Charge (\$/Customer/Mo)							
Single-Phase		\$10.35	\$1.62	\$4.34	\$19.69	\$36.00	\$36.00
Three-Phase		\$10.35	\$1.62	\$4.34	\$28.69	\$45.00	\$45.00
Coincident Demand Charge * (\$/kW/Month)	\$29.50						\$29.50
Energy Charge (\$/kWh)	\$0.04220				\$0.0420	\$0.0420	\$0.0842

INTERRUPTIBLE SERVICE FOR IRRIGATION AND WATER PUMPING SERVICE SCHEDULE IS2

*The Coincident Demand Charge is applied to the customer's monthly measured demand as recorded by suitable metering device at the time of the AEPCO peak.

Metering Cost

The customer shall pay the Cooperative, prior to installation, any cost for the time-of-use and demand meter, special metering or control equipment which cost exceeds the cost that would be incurred by the Cooperative for non-interruptible service.

Control and Metering

The service will be interrupted anytime TRICO anticipates the possibility of a maximum monthly peak kilowatt demand. Control will be initiated by TRICO and the control signal will be via radio-controlled equipment or notification will be provided to customer by telephone or some other normal method of load control. The Cooperative will not interrupt more than twelve times in any given month.

The account will be metered with a time-of-use/demand meter to enable TRICO to accurately measure the customer's kW Demand during control periods and at the time of monthly AEPCO billing peak. If TRICO does not initiate control at the proper time to avoid the AEPCO billing peak or if the control system does not properly function to disconnect the load, the customer will not be billed the Coincident Demand Charge.

An Interruptible Service Agreement, discussing all conditions of interruptible service, will be signed by TRICO and the customer.

Minimum Monthly Charge

The greater of the following, not including any wholesale power cost adjustor or any other adder approved by the Arizona Corporation Commission:

1. The Customer Charge;
2. \$1.00 per kVA of required transformer capacity;
3. The amount specified in the written contract between the Cooperative and the customer.

Tax Adjustment

To the charge computed in this rate schedule, including all adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Cooperative and/or the price or revenue from the electric energy or service sold and/or the volume of energy purchased for sale and/or sold hereunder.

Wholesale Power Cost Adjustment

The Cooperative shall, if purchased power cost is increased or decreased above or below the base purchased power cost of \$0.081638 per kWh sold, flow through such increases or decreases to all classes of customers.

In addition to the foregoing, all kWh sold to each customer under this rate schedule shall be subject to an additional temporary wholesale power cost adjustment, if any, that may be charged the Cooperative by its supplier of electricity which consists of an additional surcharge, a temporary credit and/or a fuel bank surcharge.

Rules and Regulations

The Rules and Regulations and Line Extension Policies of the Cooperative as on file with the Arizona Corporation Commission shall apply to this rate schedule.

Upon application for service or upon request, the Cooperative will assist the customer in selecting the rate schedule best suited to his requirements, but the Cooperative does not guarantee the customer will be served under the most favorable rate schedule. Upon written notification of any material changes in the customer's installation, load conditions or use of service, the Cooperative will assist in determining if a change in rates is desirable. No more than one (1) such change at the customer's request will be made within any twelve (12) month period.

Contract

If service is requested in the Cooperative's Certificated Area and the provisions outlined in the Availability Clause of this rate tariff cannot be met, it will be necessary for the Cooperative and customer to mutually agree, in a written contract, on the conditions under which service will be made available.

Service Availability Charge

A Service Availability Charge to be paid by the customer to the Cooperative may be included in the contract to reimburse the Cooperative for its operating expenses with regard to idle or standby services in connection with the facilities constructed or installed pursuant to the contract based upon the Cooperative's estimate of its actual operating costs for such idle or standby services.

Renewable Energy Standard (RES) Surcharge

The Cooperative shall add to its bill a RES Surcharge in accordance with the approved RES tariff to help offset the costs associated with the Cooperative's programs designed to promote alternative generation requirements that satisfy the RES as approved by the Arizona Corporation Commission. Other charges may be applicable subject to approval by the Arizona Corporation Commission.

Demand Side Management (DSM) Programs; DSM Adjustment Mechanism

The Cooperative shall recover its cost for pre-approved DSM programs through a separate DSM adjustment mechanism which shall provide for a separate and specific accounting for pre-approved DSM costs.
